

Xerox Replacement Cartridges

Quality, Performance and Sustainability

No risk... no worries

January 2010

Sustainability

No-one should waste resources - our Earth is too precious to us, and the generations that follow. Reduce, re-use, and recycle, are crucial to future generations - today.

Good for performance and conservation

Xerox invented the printer cartridge and all other OEMs use them today.

Our replacement cartridges keep plastic out of the waste stream. While they contain new and reprocessed components, all critical xerographic parts are 100% new.

Our cartridges feature Xerox specified and approved toner, as well as new photoreceptors, cleaning blades, certified developer roll sleeves and more.

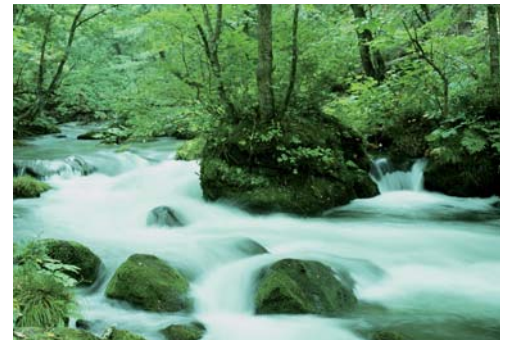

Xerox has a very long history of **environmental stewardship**. Our replacement cartridges not only save you money, but help to keep waste from landfills. It's the best option for your business and for the environment. And, when you recycle used cartridges locally, it lowers your carbon footprint. Great news by any calculation.

Total Performance Warranty

Put Xerox quality into your printer and get the advantage of the triple benefit Total Performance Warranty:

OEM Quality

Xerox actually invented laser printing and has engineering laboratories dedicated to cartridge and drum product performance. Xerox engineer their cartridges so that the page yield and performance is equal to, or better than the OEM. Xerox won't offer a cartridge if it won't pass our testing - from first print to last, in a variety of stressful environmental conditions.

Lifetime Performance

If there is still toner in your Xerox cartridge, the last page will look as good as the first. If not, Xerox will replace the cartridge to ensure that you are satisfied. It's that easy. No worries.

Risk-free Printing

When you choose a Xerox brand cartridge for your printer, there is no risk to your printer OEM warranty. If our cartridge is responsible for any printer damage, Xerox will pay your repair costs. It's that simple. No risk.

Triple tested for quality assurance

To ensure your satisfaction, we constantly monitor the manufacturing quality.

First, we print test 100% of cartridges before packaging.

Second, we perform monthly life testing at the manufacturing site.

Third, our technical engineers test samples from our warehouse inventory.

Quality

There are a number of cartridge choices on the market. From OEM to toner refill, there are options for every budget. But, to Xerox, there is only one standard—the printer OEM (Original Equipment Manufacturer). Our goal is to equal the OEM in every way but cost.

And if we cannot meet OEM quality and performance, we simply don't sell that particular cartridge.

Xerox Replacement Cartridges meet demanding Xerox specifications as well as some pretty tough independent standards...because we want to meet your standards, print after print.

Our production and distribution facilities meet ISO 9001 standards as well as ISO 14001 environmental standards. Our quality standards comply with DIN33870. We fully support and comply with REACH for all chemicals and materials contained in our cartridges. While we do not carry ISO IEC test standards on our products, we use and meet the test protocols for 19752 (monochrome) and 19798 (colour) page yields.

Xerox is committed to **intellectual property protection**. We respect the intellectual property of your printer manufacturer and diligently work to prevent any patent infringements. While there is no risk to the customer, you can be confident that your Xerox Replacement Cartridge is fully compliant with these laws and statutes.
